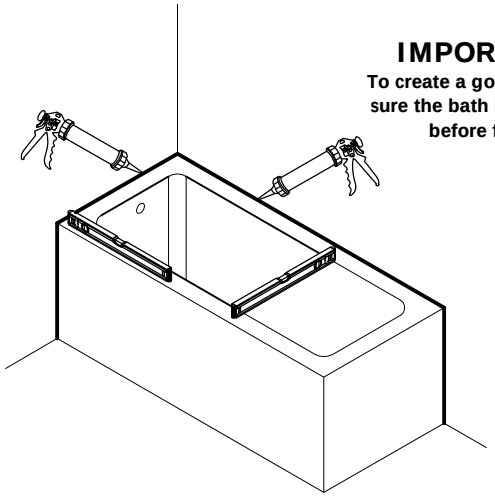
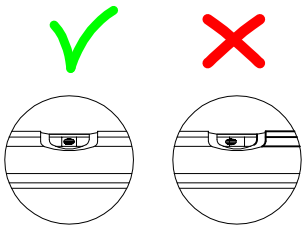
Step 1



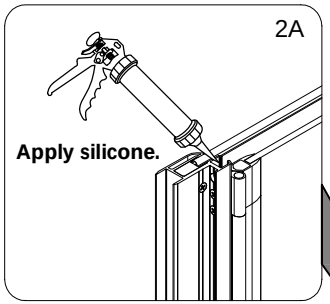
IMPORTANT!

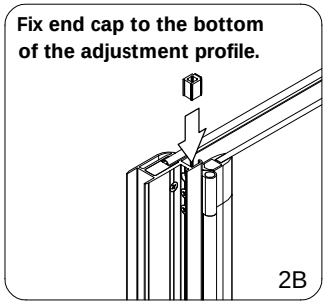
To create a good seal make sure the bath is 100% level before fitting.

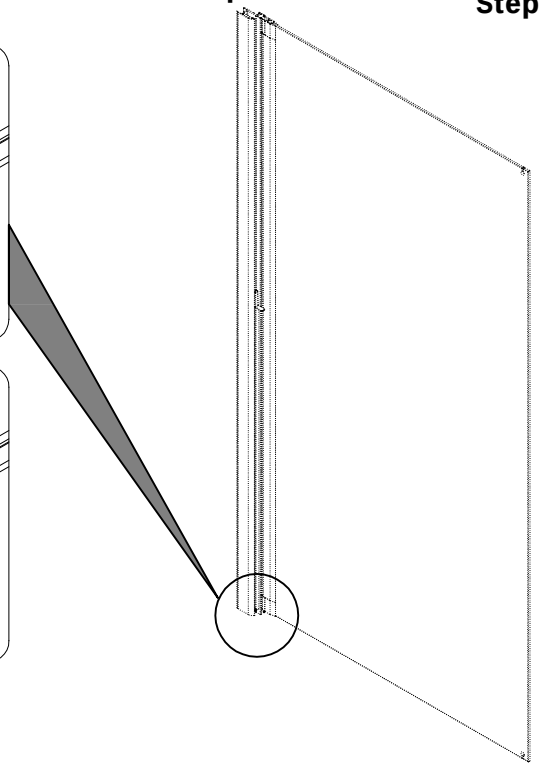


Left hand - as packed

Step 2

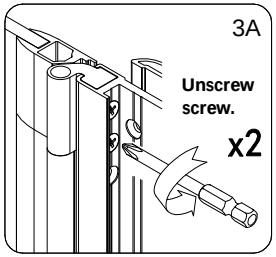


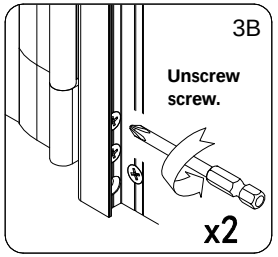


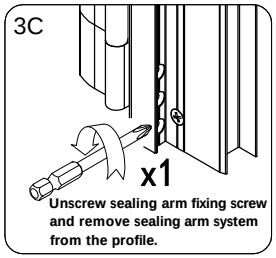


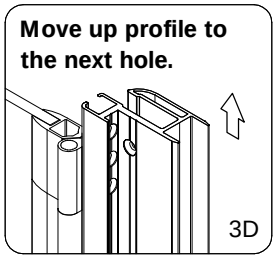
Change product handing to right hand

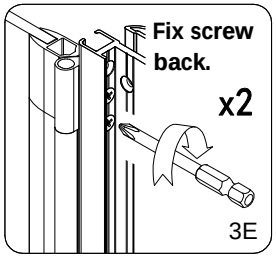
Step 3

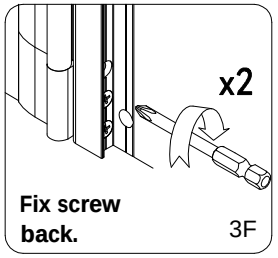


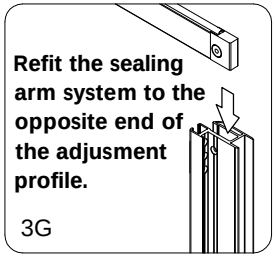


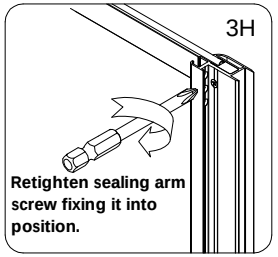


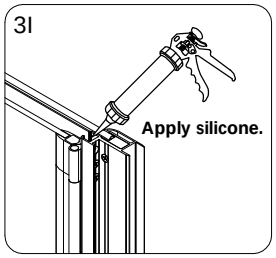


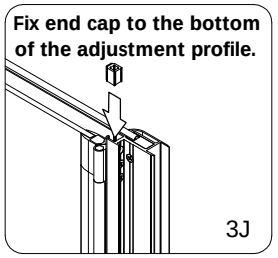




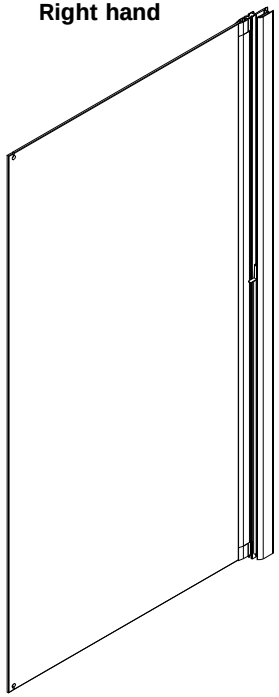




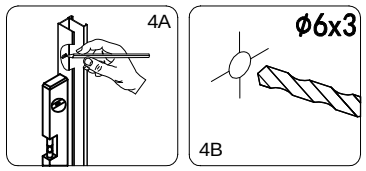


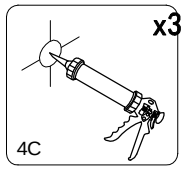


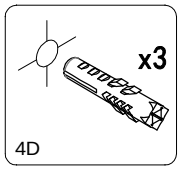
Right hand

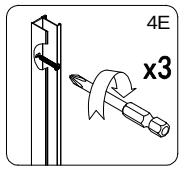


Fitting wall profile



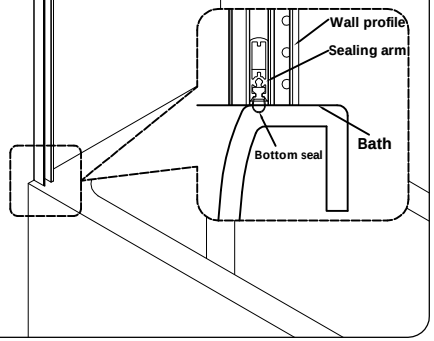


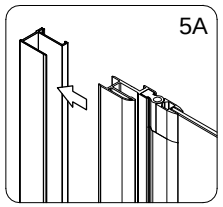


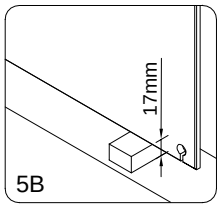


Step 4

Position your wall profile so that the moving panel is on the inside edge of the bath tub.





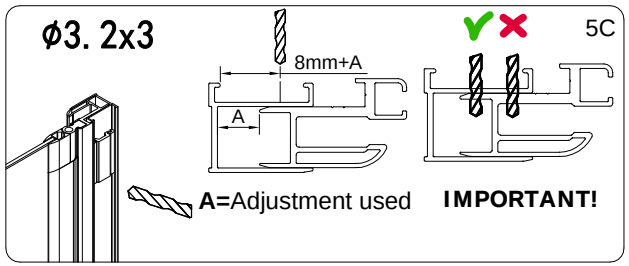


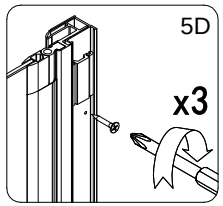
Step 5

IMPORTANT!

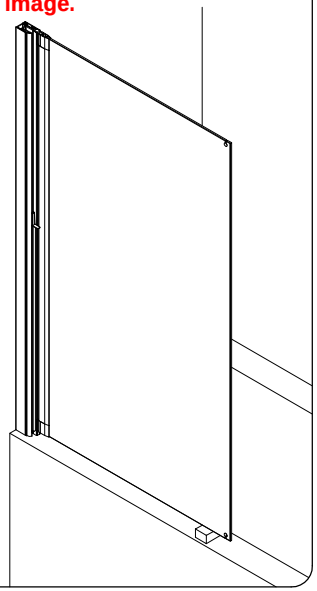
Use the spacers supplied to get an equal gap between the bath and the underside of your moving panel.

Ensure your bath screen is fully open as per image.

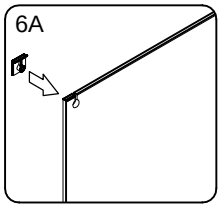


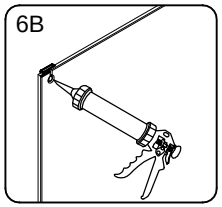


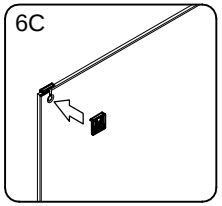
The frame fixing screw must be positioned through both profiles as shown above.

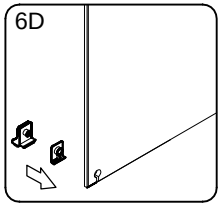


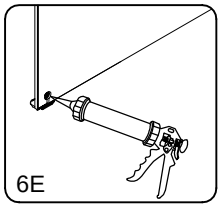
Fitting bottom brackets and top badge

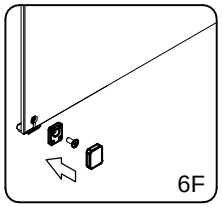






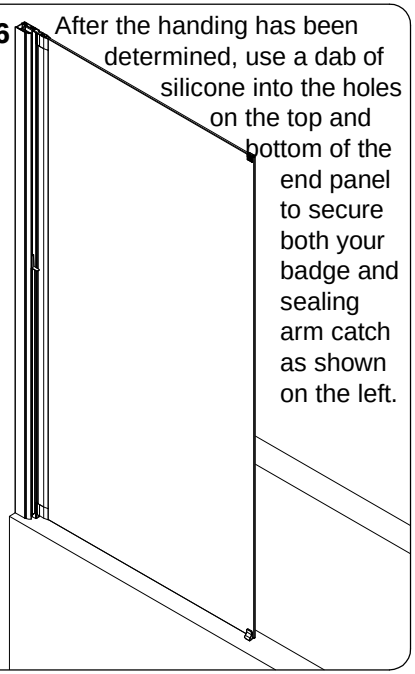


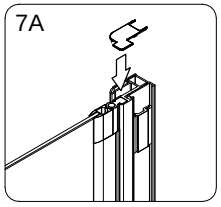


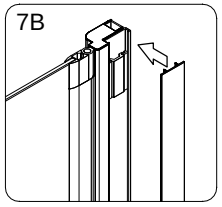


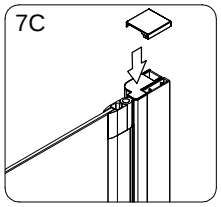
Step 6

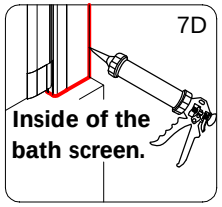
After the handing has been determined, use a dab of silicone into the holes on the top and bottom of the end panel to secure both your badge and sealing arm catch as shown on the left.

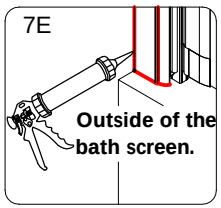












Step 7

To complete the installation seal your screen by applying silicone to the inside & outside of the wall & adjusting profile as shown above.

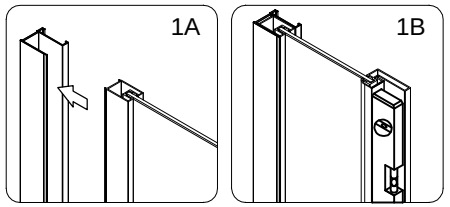
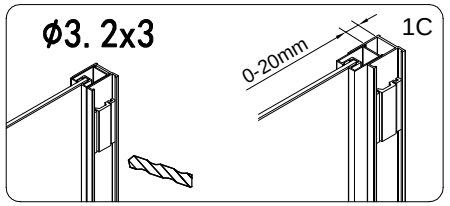
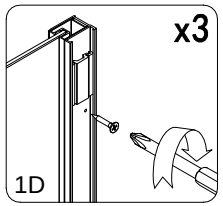
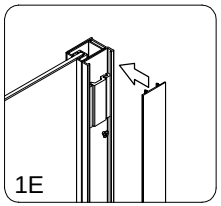
Fitting wall profile and fixed panel

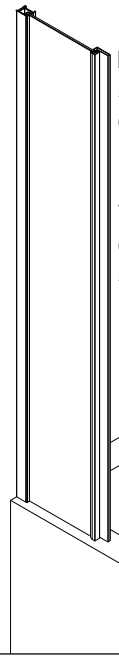
Step 1







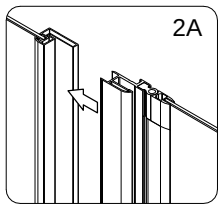


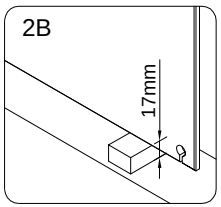


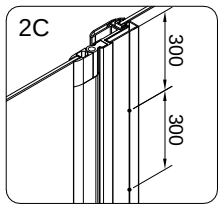
Position your wall profile so that both panels are on the very inside edge of the bath tub.

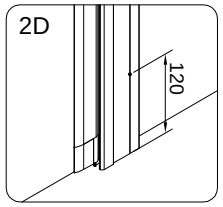
Then follow steps shown on instruction for the single panel bath screen.

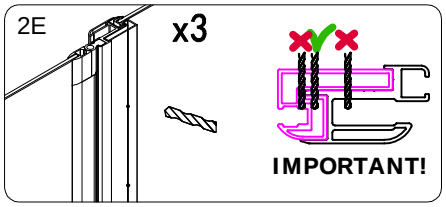
Step 2

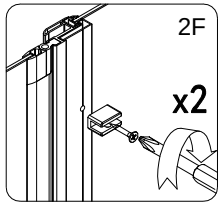


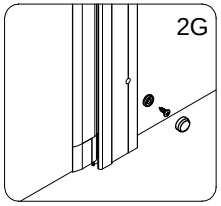












IMPORTANT!
You must drill through the center of the vertical line on the inside of the profile like above to ensure you do not drill into the fixed glass panel.

It's critical that you drill straight and not at an angle.
