Operation

Temperature Control

For cold water, position the handle straight forward so it is parallel with the spout (the handle will stop here when pushing it to the right)

To increase temperature, turn the handle to the left

The temperature will gradually rise the further the rotation of the handle

The handle will cease to turn once it is at a 90° angle, supplying the maximum temperature

Tools Required for Installation/ Maintenance

Features Eco Start

Adjustable Spanner

Hexagonal Keys

Flat Head

Box Spanner (fixing rod nut)

Prior to Installation

All products manufactured and supplied by Bristan are safe to use provided that they are installed, operated and receive regular maintenance in accordance with these instructions.

This product needs to be installed in accordance with, and meet the requirements of The Water Supply (Water Fittings) Regulations (Northern Ireland) 2009 and The Water Supply (Water Fittings) (Scotland) Byelaws 2014. For full Installation Requirements & Notes (IRN) please visit www.wrasapprovals.co.uk/approvals-directory

Isolation valves must be fitted to the inlet water supplies to ensure ease of future maintenance.

Before installing this product the water supply must be thoroughly flushed in order to remove any swarf, solder etc. Full access must be made available for future maintenance/servicing purposes.

This product must not be modified in any way as this will invalidate the guarantee.

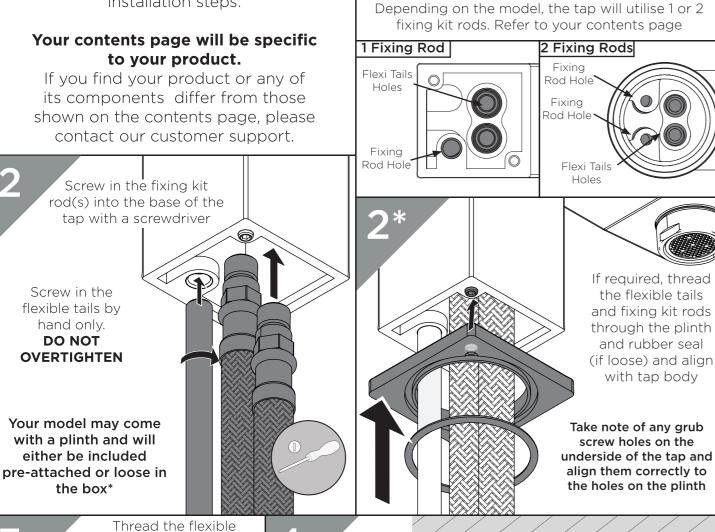

Spare Parts

To replace any spare parts for your tap, why not scan the QR Code or visit www.bristan.com and search for your product.

(!) Important

The images shown are for illustrative purposes only.

The tap you have purchased may look different to those pictured in this booklet but will follow the same installation steps.

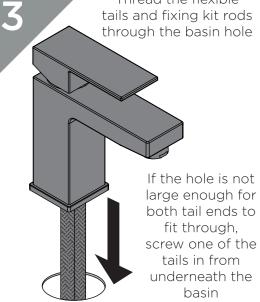

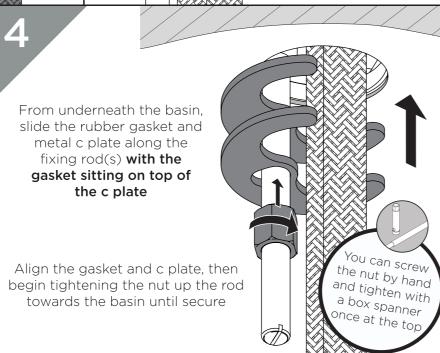

Installation

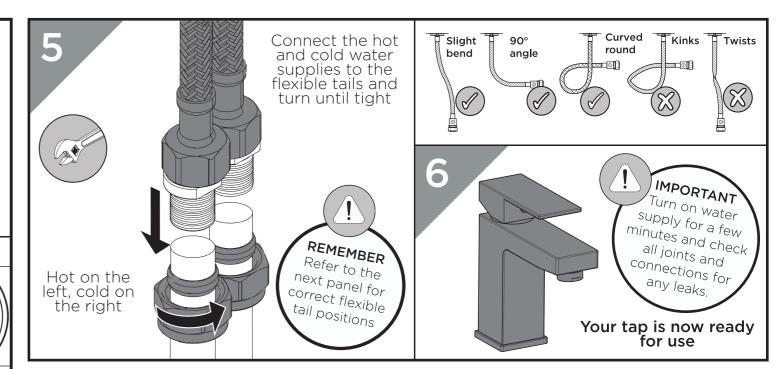

Look underneath the

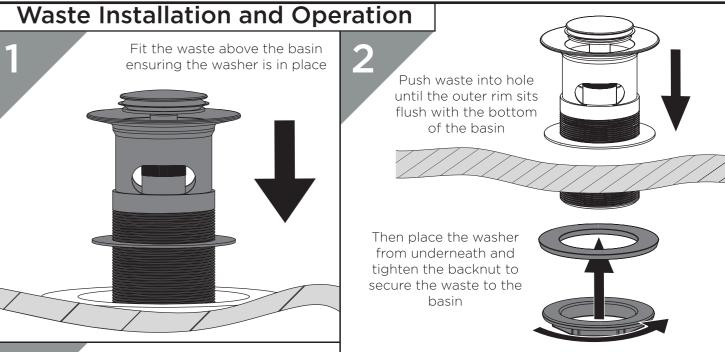

tap body to observe

fixing kit rod(s) and tail inlet positions

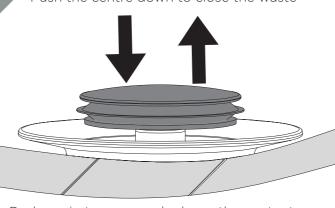

Push the centre down to close the waste Bristan materia

Push again to open and release the contents of the basin

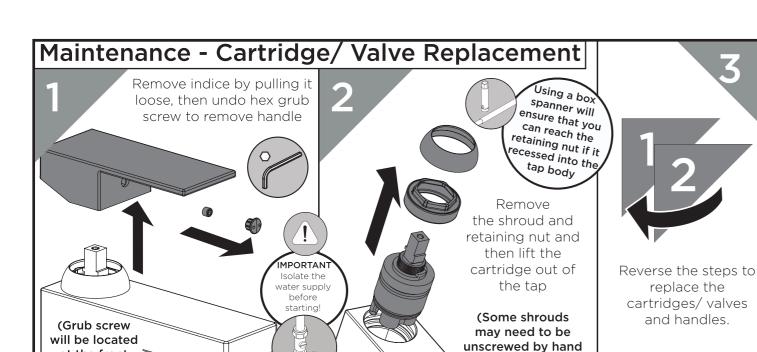

Your waste is now ready for use

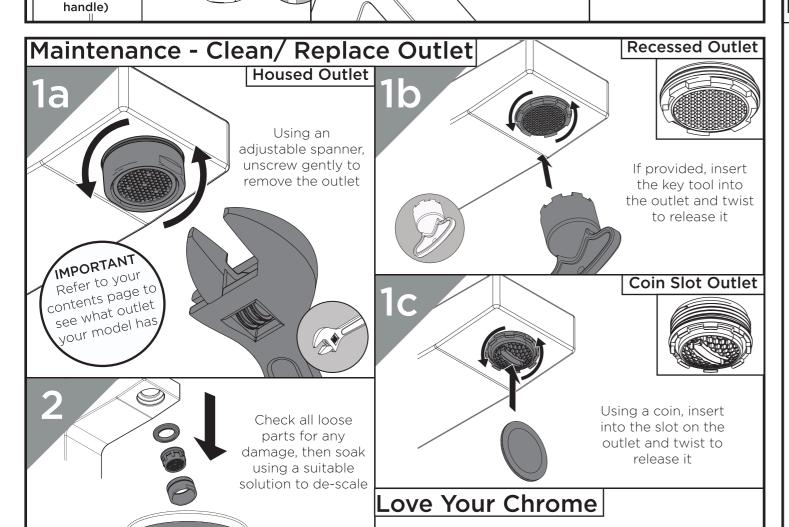

General Cleaning

Bristan products are made from premium materials, with hand polished, electroplated, PVD or EPD finishes.

Your taps or shower should be regularly cleaned with warm water, a mild pH-neutral liquid soap, and polished with a soft cloth. Any residues from soap, toothpaste, shampoos and shower gels can cause blemishes if not rinsed off straight after

Household bleaches and cleaners contain harsh chemicals and may damage the surface finish. Avoid using abrasive cloths, scouring pads, scrub sponges, steel wool or anything similar.

Troubleshooting

ı		
Symptom	Cause	Remedy
Low Flow	Partially closed isolation valve.	Open isolation valve.
	Airlock or partial blockage in the supply pipework.	Flush through pipework to ensure removal of debris and any airlocks.
	Partial blockage in the outlet	Remove to Clean and soak in suitable solution.
No hot water or cycling hot and cold	Instantaneous water heater cycles on and off as flow rate or pressure is too low.	Increase water flow rate or pressure through system.
No Flow	Closed isolation valve.	Open isolation valve.
	Mains water supply turned off.	Turn on mains water supply.
Temperatures not corresponding with taps	Inlet pipes have been connected incorrectly	Swap the inlet tails around.

Notes

Please use this space for any notes you or your installer may have regarding the installation/plumbing of this product.
