

BEFORE YOU START

Important Pre-Installation Notes

Remove all packaging and check the fitting for damage before starting installation.

Before starting any installation please consider the following: before drilling into walls, check that there are no hidden electrical wires, cables or water supply pipes. This can be checked with the aid of an electronic detector.

If power tools are used do not forget to:

- Wear eye protection
- Unplug equipment after use

Tools Required (not supplied):

Drill + 6mm Drill Bit

Pencil

Tape Measure

Screw Driver (Phillips No2)

Spirit Level

Safety Goggles

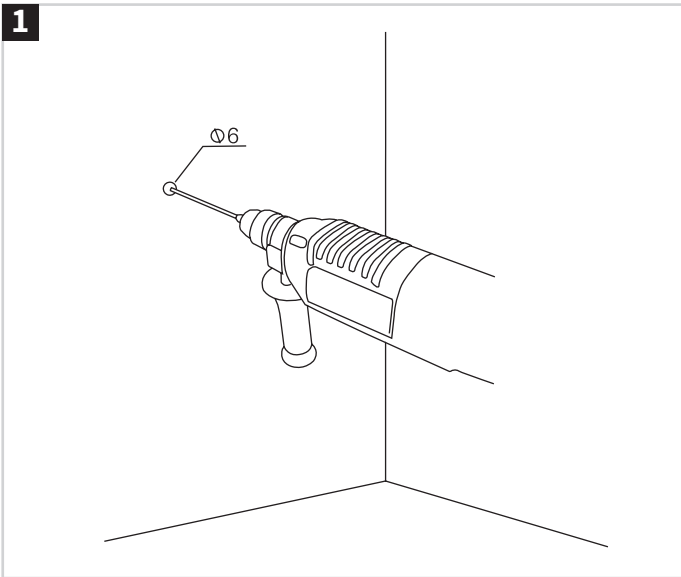

Water Based Silicone Sealant

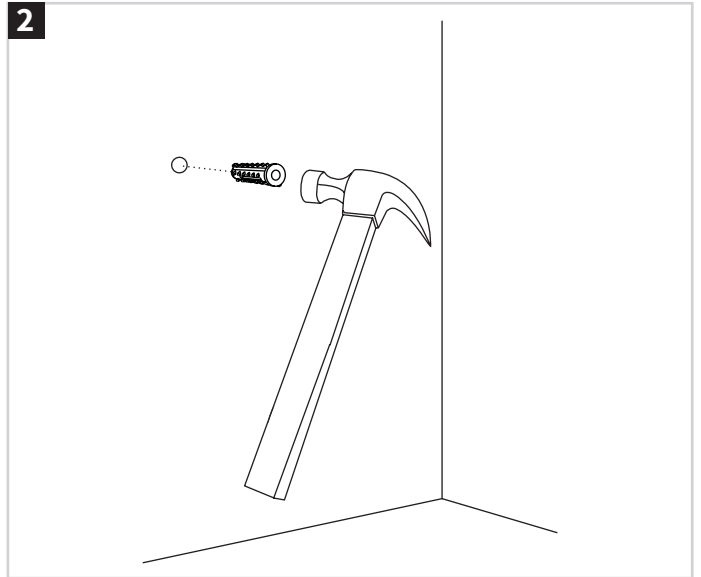

INSTALLATION

1

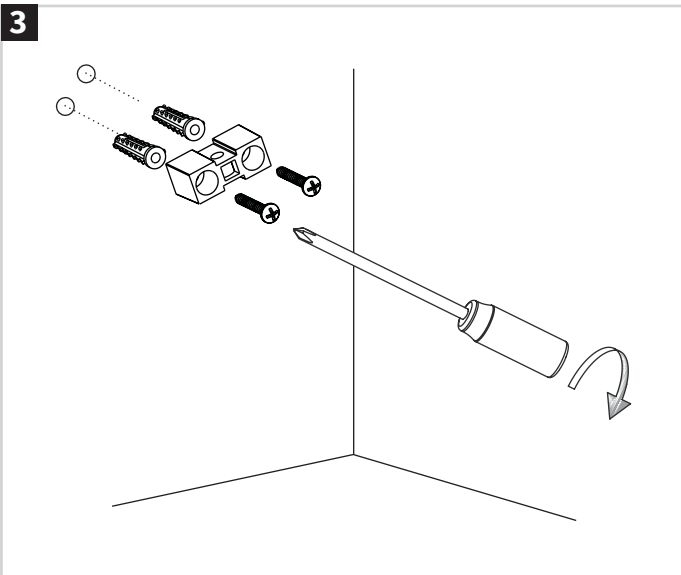

Measure area where accessory will be installed. Use drill to create hole.

2

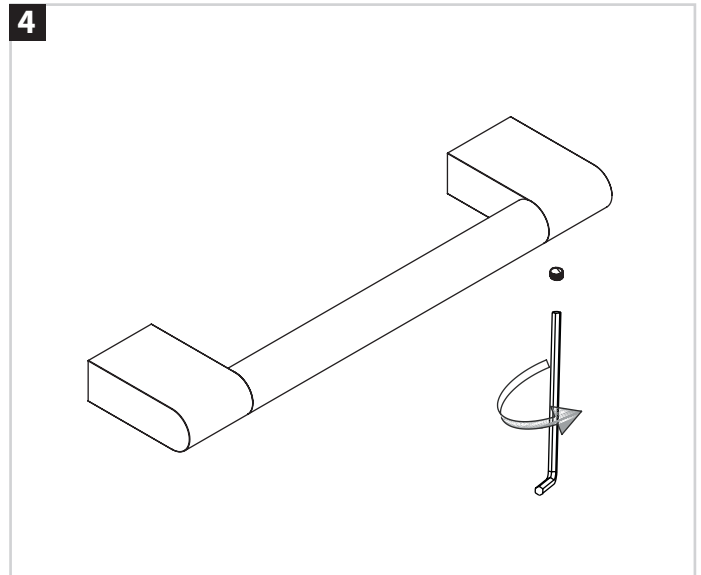

Place raw plug in hole and use hammer lightly to ensure fully in the wall.

3

Align base holes with raw plugs in the wall and use a screw driver to secure in place.

4

Place accessory over base on the wall and tighten the grub screw in place with a hexagonal key with the grub screw.

CARE & MAINTENANCE

The material we use in our accessories is very durable, nevertheless care should be taken when cleaning them. They should be cleaned only with warm soapy water followed by rinsing with clean water and drying with a soft cloth. All finishes are vulnerable to acid attack and some strong substances such as household cleaners, disinfectants, denture cleaners, hair dyes, wine making, and photographic chemicals can cause the surface to go black or peel.

Note: Never use abrasive detergents or disinfectants or those containing alcohol, hydrochloric acid or phosphoric acid.
